

Andrew Harman

ASSOCIATE
Building Code Consultant

Key professional experience

Andrew is experienced in the assessment and approval of complex, landmark commercial developments. These range from multi-storey office and residential buildings, to sports stadiums, power stations, hospital redevelopments, warehouses, government projects and industrial facilities.

Andrew's expertise includes technical assessment of development applications for building works to ascertain compliance relevant to state legislation, negotiating the challenges of applying building code compliance to complex designs together with assessments of fire engineered solutions.

He advises clients from design stage to project completion, actively inspecting building work for all classes of buildings.

Andrew also provides building code compliance and fire safety advice to government and private building owners of existing buildings and facilities. This includes inspection and reporting on existing level of compliance/fire safety and providing comprehensive risk assessment of compliance aspects and providing feasible recommendations for upgrades or improvements.

Qualifications

- Bachelor of Applied Science (Construction Management), Queensland University of Technology, Brisbane, 2005
