

BUILDING CODE CONSULTANT / BUILDING SURVEYOR

Location	Brisbane Airport
Employment Type	Full time
Start Date	ASAP
Requirements	Australian Citizenship required

ABOUT PHILIP CHUN

Since 1990, Philip Chun has been a trusted name in building compliance, accessibility, and essential services consulting across Australia. Our national team includes Accredited Certifiers, Building Inspectors, Access Consultants, Fire Safety Practitioners, and Airport Building Controllers, supported by a professional and collaborative network of specialists.

With offices in Sydney, Melbourne, Brisbane, Perth and Canberra, and long-standing appointments as Airport Building Controllers across key federally leased airports, we're one of the largest and most respected multi-disciplinary consulting firms in the country.

YOUR NEW OPPORTUNITY

We are seeking a Building Code Consultant / Building Surveyor to join our team at Brisbane Airport. This opportunity would suit someone with 1-3 years of experience in Queensland building certification, or similar relevant experience in the Queensland construction industry.

You will work in a professional regulatory environment alongside experienced Building Surveyors and Airport Building Controllers, contributing to a range of building and construction projects within the airport environment.

The role offers practical exposure to building compliance, technical assessments, inspections and regulatory processes, with support from senior team members as you continue to build your experience.

As this role is based at Brisbane Airport, Australian citizenship and a willingness to undertake the required security clearance process are essential.

WHAT YOU'LL BRING

- A relevant qualification in Building Surveying, Construction Management or a related discipline
- 1-3 years of experience in Queensland building certification, or similar relevant experience in the Queensland construction industry
- Working knowledge of the National Construction Code and Queensland building legislation and approval processes
- Strong written and verbal communication skills
- Strong attention to detail and a practical, solutions-focused approach
- Ability to manage competing priorities and meet project deadlines
- Confidence working with clients, consultants, contractors and regulatory stakeholders
- Proficiency in Microsoft Office, including Word, Excel and Outlook
- Australian citizenship and willingness to undertake the required security clearance process

WHAT YOU'LL BE DOING

Working with experienced professionals, you'll:

- Review plans, specifications and supporting documentation for compliance with the National Construction Code and relevant legislation
- Prepare technical assessments, reports, correspondence and regulatory documentation
- Liaise with architects, engineers, contractors, authorities and other project stakeholders
- Assist with building inspections and the preparation of associated records and reports
- Support permit, approval and compliance processes within the airport environment
- Maintain accurate project files, registers and compliance documentation
- Contribute to the timely delivery of projects while working closely with the broader Airport Building Control team

WHAT WE OFFER

- Structured learning and professional development from industry leaders
- A supportive and collaborative team environment
- Exposure to high-profile, large-scale development projects
- A diverse role with opportunities to build your technical and regulatory experience
- Additional leave between Christmas and New Year
- Long-term career development within a respected national consultancy

APPLICATION

Because this position is located at Brisbane Airport, applicants must be Australian citizens and willing to undertake the required security clearance process.

Please submit a cover letter outlining your experience and CV to emily.raper@philipchun.com
